MedIntelliBase™ features comprehensive online information datastore on Coronary Artery Revascularization Market, Clinical Research and Technology Developments & Trends

REDMOND, WA—June 30, 2005— MedIntelliBase, a new online service featuring the medical industry's most extensive cardiovascular market research and an authoritative data storehouse on related technologies, products, trends and clinical research, has been launched by The Next Phase Publishing. Available by subscription, the inaugural track for MedIntelliBase investigates ***“Coronary Artery Revascularization: Developments and Trends in Restenosis Prevention and Treatment—Beyond Drug-Eluting Stents.”***

“MedIntelliBase (MIB) is a comprehensive service that enables subscribers to quickly navigate a vast knowledgebase of medical intelligence anywhere, anytime,” according to Victoria Hunsicker Sanko, president of The Next Phase Publishing. “Each MIB MarketTrack seamlessly integrates continuously updated **MIB databases –Competing Technologies, Clinical Trials and Competing Companies** – along with an in-depth, continuously updated **Research Study.**” All aspects of the Cardiovascular Revascularization track including the market overview, competing products, technologies, companies, and clinical research are linked throughout for quick, easy access.”

“Coronary Artery Revascularization” explores all modalities used in coronary interventions. This **MarketTrack** examines past, present, and future cardiovascular therapies - offering historical perspectives while also providing analysis and intelligence about prospective developments. Established as well as startup competitors are analyzed for virtually all drugs, biotech agents and medical devices developed to achieve revascularization and reduce restenosis.

This online knowledgebase covers nearly 300 companies and research institutions including Cordis and Boston Scientific, over 170 technologies including drug-eluting stents and gene therapy, over 700 products and nearly 300 clinical trials and registries, and cites over 1,500 published sources. The Cardiovascular MIB is the first in a planned series of services covering the hottest topics in medicine today.

For more information including access to the **MedIntelliBase Tour**, the **Index of Contents**, and pricing, visit <http://www.MedIntelliBase.com> or e-mail Marketing@TheNextPhase.com.

About the publisher: The Next Phase Publishing, Inc. serves the medical industry with delivery of in-depth, up-to-date intelligence by Internet subscription. The firm provides commercial, clinical, and technology information and analysis to biomedical and life science technology and related service companies and to hospitals and physicians.
